Electroencephalography and clinical Neurophysiology 103 (1997) 701–706

Index of Subjects

VOLUME 103 (1997)

(Abstracts from Society Proceedings are not included)

Acceleration; Alpha; Beta; Theta; Delta; $+G_z$ (103) 563

Aerobic exercise; P3(00); Event-related potential (ERP); Auditory/visual stimuli (103) 493

Alcoholics; Implicit memory; ERP; Priming; Picture; Word (103) 457

Alertness; Maintenance of wakefulness test; MWT; Excessive daytime somnolence; Sleepiness; Polysomnography; Narcolepsy (103) 554

Alpha; Acceleration; Beta; Theta; Delta; $+G_z$ (103) 563

Alzheimer's disease; Dementia; Quantitative; EEG; Discriminant analysis; Fractal dimension; Classification; Neuronal network (103) 241

Amplitude modulation; Frequency-following potential; Latency estimation; Cross-correlation (103) 326

Amygdaloid kindling; Claustral; Convulsive evolution; Kindled convulsion (103) 249

Arousal; ERPs; Emotion; N300; P300; Valence (103) 298

Artifact-interrupting circuit; Transcranial magnetic stimulation; Electroencephalography; Evoked potentials; Healthy humans; Safety (103) 319

Assistive communication; Prosthesis; Rehabilitation; Operant conditioning; Sensorimotor cortex; Mu rhythm; Electroencephalography (103) 386

Auditory/visual stimuli; P3(00); Event-related potential (ERP); Aerobic exercise (103) 493

Automatic spike detection; Epilepsy; Electroencephalography; Lateralisation (103) 421

Beta; Acceleration; Alpha; Theta; Delta; $+G_z$ (103) 563

Biomagnetism; CA1; CA3; Hippocampus; Magnetoencephalography (MEG); Electroencephalography (EEG) (103) 474

Bispectrum; Non-linearity; Epilepsy; Cooperativity; Subdural; Hippocampus; Higher moment (103) 661

Blind source separation (BSS); EEG; EOG; Ocular artefact correction; Independent component analysis (ICA) (103) 395

Boundary element method; Somatosensory evoked potential; Source reconstruction; Reproducibility; Validity; Functional magnetic resonance imaging (103) 652

Brain topography; EEG; Spectral analysis; Spindle frequency activity (103) 535

CA1; CA3; Hippocampus; Magnetoencephalography (MEG); Electroencephalography (EEG); Biomagnetism (103) 474

CA3; CA1; Hippocampus; Magnetoencephalography (MEG); Electroencephalography (EEG); Biomagnetism (103) 474

Carbamazepine; Neuronal complexity loss; Correlation dimension; Primary epileptogenic area; Temporal lobe epilepsy; ECoG (103) 376

Carotid endarterectomy; EEG; Somatosensory evoked potentials; Surgical monitoring; Scoliosis; Staffing patterns (103) 616

Central beta rhythm; Event-related desynchronisation (ERD); Event-related synchronisation (ERS); Mu rhythm; Motor imagery (103) 642

Cerebellar gait; Neurophysiology of movement; Gait disorder; Leg muscle activation; Parkinson's disease; Spastic gait; Load receptor function (103) 333

Classification; Alzheimer's disease; Dementia; Quantitative; EEG; Discriminant analysis; Fractal dimension; Neuronal network (103) 241

Claustral; Amygdaloid kindling; Convulsive evolution; Kindled convulsion (103) 249

Cognitive development; Novelty P3; Cognitive ERPs; Temporal order; Novel stimuli (103) 304

Cognitive ERPs; Novelty P3; Temporal order; Cognitive development; Novel stimuli (103) 304

Coherence; Spline-Laplacian; Cortical image (103) 499

Component jitter; Topographic component model; Event-related potentials (103) 381

Computer aided diagnosis; Electroencephalography; Telemetry; Epilepsy; Seizure (103) 445

Convulsive evolution; Claustral; Amygdaloid kindling; Kindled convulsion (103) 249

EEG 30029

Cooperativity; Bispectrum; Non-linearity; Epilepsy; Subdural; Hippocampus; Higher moment (103) 661

Correlation dimension; Neuronal complexity loss; Carbamazepine; Primary epileptogenic area; Temporal lobe epilepsy; ECoG (103) 376

Correlation; Dementia of Alzheimer's Type; EEG; Frequency spectrum analysis; PET (103) 409

Cortical image; Coherence; Spline-Laplacian (103) 499

Cortisol secretion; Sleep; EEG spectral analysis; Delta wave activity; Cross-correlation (103) 405

Cross-correlation; Cortisol secretion; Sleep; EEG spectral analysis; Delta wave activity (103) 405

Cross-correlation; Frequency-following potential; Latency estimation; Amplitude modulation (103) 326

Delta band activity; Waking-sleeping transition period; EEG auto power; Intrahemispheric coherence; Theta band activity; Principal component analysis (103) 633

Delta wave activity; Cortisol secretion; Sleep; EEG spectral analysis; Cross-correlation (103) 405

Delta; Acceleration; Alpha; Beta; Theta; $+G_z$ (103) 563

Dementia of Alzheimer's Type; EEG; Frequency spectrum analysis; PET; Correlation (103) 409

Dementia; Alzheimer's disease; Quantitative; EEG; Discriminant analysis; Fractal dimension; Classification; Neuronal network (103) 241

Depth EEG; Hippocampus; MRI; Mesial temporal sclerosis (103) 692

Detection; EEG; Seizure; Newborn; Evaluation (103) 363

Detection; Seizure; Newborn; EEG (103) 356

Developmental neurological diagnostics; Quantitative EEG analysis; Spectral parameters; Pre-school age (103) 516

Dipole estimation; Magnetoencephalography; Jerk-locked back averaging; Epilepsia partialis continua (103) 440

Discriminant analysis; Alzheimer's disease; Dementia; Quantitative; EEG; Fractal dimension; Classification; Neuronal network (103) 241

ECoG; Neuronal complexity loss; Correlation dimension; Carbamazepine; Primary epileptogenic area; Temporal lobe epilepsy (103) 376

ECT; EEG; Seizure adequacy; Lyapunov exponent (103) 599

EEG auto power; Waking-sleeping transition period; Intrahemispheric coherence; Delta band activity; Theta band activity; Principal component analysis (103) 633

EEG automatic analysis; Sleep homeostasis; Night waking; Infants; NREM-REM sleep cycle (103) 621

EEG spatial deblurring; High resolution EEG; Surface Laplacian of the potential; MR-constructed subject's head model; Locally-predicted scalp resistance; Event-related potentials (ERPs) (103) 486

EEG spectral analysis; Cortisol secretion; Sleep; Delta wave activity; Cross-correlation (103) 405

EEG; Alzheimer's disease; Dementia; Quantitative; Discriminant analysis; Fractal dimension; Classification; Neuronal network (103) 241

EEG; Dementia of Alzheimer's Type; Frequency spectrum analysis; PET; Correlation (103) 409

EEG; ECT; Seizure adequacy; Lyapunov exponent (103) 599

EEG; EOG; Ocular artefact correction; Independent component analysis (ICA); Blind source separation (BSS) (103) 395

EEG; Seizure; Detection; Newborn (103) 356

EEG; Seizure; Detection; Newborn; Evaluation (103) 363

EEG; Somatosensory evoked potentials; Surgical monitoring; Carotid endarterectomy; Scoliosis; Staffing patterns (103) 616

EEG; Spectral analysis; Spindle frequency activity; Brain topography (103) 535

EEG; Stage 2; REM; Stage 2-to-REM sleep transition; Sleep (103) 543

EEG; Stimulus-evoked patterns; Neonate; Reactivity (103) 679

Electroencephalogram; Topography; Scalp distribution; Scaling; Statistics; Event-related potentials (103) 323

Electroencephalography (EEG); CA1; CA3; Hippocampus; Magnetoencephalography (MEG); Biomagnetism (103) 474

Electroencephalography; Epilepsy; Automatic spike detection; Lateralisation (103) 421

Electroencephalography; Prosthesis; Rehabilitation; Assistive communication; Operant conditioning; Sensorimotor cortex; Mu rhythm (103) 386

Electroencephalography; Telemetry; Epilepsy; Seizure; Computer aided diagnosis (103) 445

Electroencephalography; Transcranial magnetic stimulation; Evoked potentials; Artifact-interrupting circuit; Healthy humans; Safety (103) 319

Electromyography; Quantitative electromyography; Neurophysiology; Motor unit; Neuromuscular disorders (103) 579

Emotion; ERPs; N300; P300; Valence; Arousal (103) 298

EOG; EEG; Ocular artefact correction; Independent component analysis (ICA); Blind source separation (BSS) (103) 395

Epilepsia partialis continua; Magnetoencephalography; Jerk-locked back averaging; Dipole estimation (103) 440

Epilepsy; Bispectrum; Non-linearity; Cooperativity; Subdural; Hippocampus; Higher moment (103) 661

Epilepsy; Electroencephalography; Automatic spike detection; Lateralisation (103) 421

Epilepsy; Electroencephalography; Telemetry; Seizure; Computer aided diagnosis (103) 445

Epilepsy; Event-related potentials; Habituation; Repetition; N2 wave; P3 wave (103) 450

ERP; Alcoholics; Implicit memory; Priming; Picture; Word (103) 457

ERPs; Emotion; N300; P300; Valence; Arousal (103) 298

Evaluation; EEG; Seizure; Detection; Newborn (103) 363

Event-related desynchronisation (ERD); Event-related synchronisation (ERS); Mu rhythm; Central beta rhythm; Motor imagery (103) 642

Event-related potential (ERP); P3(00); Aerobic exercise; Auditory/visual stimuli (103) 493

Event-related potentials (ERPs); EEG spatial deblurring; High resolution EEG; Surface Laplacian of the potential; MR-constructed subject's head model; Locally-predicted scalp resistance (103) 486

Event-related potentials; Epilepsy; Habituation; Repetition; N2 wave; P3 wave (103) 450

Event-related potentials; General anesthesia; Information processing; N1 (103) 268

Event-related potentials; Spatial memory; Spatial perception; Working memory (103) 257

Event-related potentials; Topographic component model; Component jitter (103) 381

Event-related potentials; Topography; Scalp distribution; Scaling; Statistics; Electroencephalogram (103) 323

Event-related synchronisation (ERS); Event-related desynchronisation (ERD); Mu rhythm; Central beta rhythm; Motor imagery (103) 642

Evoked potentials; Transcranial magnetic stimulation; Electroencephalography; Artifact-interrupting circuit; Healthy humans; Safety (103) 319

Excessive daytime somnolence; Maintenance of wakefulness test; MWT; Sleepiness; Alertness; Polysomnography; Narcolepsy (103) 554

Feature conjunction; Processing negativity; Visual attention (103) 282

Fourier; Tonic-clonic seizures; Gabor (103) 434

Fractal dimension; Alzheimer's disease; Dementia; Quantitative; EEG; Discriminant analysis; Classification; Neuronal network (103) 241

Frequency-following potential; Latency estimation; Cross-correlation; Amplitude modulation (103) 326

Full-term newborns; Quantitative EEG; Premature newborns; Quiet sleep (103) 528

Functional magnetic resonance imaging; Somatosensory evoked potential; Source reconstruction; Reproducibility; Validity; Boundary element method (103) 652

+G_z; Acceleration; Alpha; Beta; Theta; Delta (103) 563

Gabor; Tonic-clonic seizures; Fourier (103) 434

Gait disorder; Neurophysiology of movement; Leg muscle activation; Parkinson's disease; Cerebellar gait; Spastic gait; Load receptor function (103) 333

General anesthesia; Information processing; Event-related potentials; N1 (103) 268

Habituation; Event-related potentials; Epilepsy; Repetition; N2 wave; P3 wave (103) 450

Healthy humans; Transcranial magnetic stimulation; Electroencephalography; Evoked potentials; Artifact-interrupting circuit; Safety (103) 319

High resolution EEG; EEG spatial deblurring; Surface Laplacian of the potential; MR-constructed subject's head model; Locally-predicted scalp resistance; Event-related potentials (ERPs) (103) 486

Higher moment; Bispectrum; Non-linearity; Epilepsy; Cooperativity; Subdural; Hippocampus (103) 661

Hippocampus; Bispectrum; Non-linearity; Epilepsy; Cooperativity; Subdural; Higher moment (103) 661

Hippocampus; CA1; CA3; Magnetoencephalography (MEG); Electroencephalography (EEG); Biomagnetism (103) 474

Hippocampus; MRI; Depth EEG; Mesial temporal sclerosis (103) 692

ICU monitoring; Vasospasm; Subarachnoid hemorrhage (103) 607

Implicit memory; Alcoholics; ERP; Priming; Picture; Word (103) 457

Independent component analysis (ICA); EEG; EOG; Ocular artefact correction; Blind source separation (BSS) (103) 395

Infants; Sleep homeostasis; Night waking; EEG automatic analysis; NREM-REM sleep cycle (103) 621

Information analysis; Sharp waves; Slow waves; Morphology (103) 426

Information processing; General anesthesia; Event-related potentials; N1 (103) 268

Intrahemispheric coherence; Waking-sleeping transition period; EEG auto power; Delta band activity; Theta band activity; Principal component analysis (103) 633

Jerk-locked back averaging; Magnetoencephalography; Epilepsia partialis continua; Dipole estimation (103) 440

Kindled convulsion; Claustral; Amygdaloid kindling; Convulsive evolution (103) 249

Latency estimation; Frequency-following potential; Cross-correlation; Amplitude modulation (103) 326

Lateralisation; Epilepsy; Electroencephalography; Automatic spike detection (103) 421

Leg muscle activation; Neurophysiology of movement; Gait disorder; Parkinson's disease; Cerebellar gait; Spastic gait; Load receptor function (103) 333

Load receptor function; Neurophysiology of movement; Gait disorder; Leg muscle activation; Parkinson's disease; Cerebellar gait; Spastic gait (103) 333

Locally-predicted scalp resistance; EEG spatial deblurring; High resolution EEG; Surface Laplacian of the potential;

MR-constructed subject's head model; Event-related potentials (ERPs) (103) 486

Lyapunov exponent; ECT; EEG; Seizure adequacy (103) 599

Magnetoencephalography (MEG); CA1; CA3; Hippocampus; Electroencephalography (EEG); Biomagnetism (103) 474

Magnetoencephalography; Jerk-locked back averaging; Epilepsia partialis continua; Dipole estimation (103) 440

Maintenance of wakefulness test; MWT; Excessive daytime somnolence; Sleepiness; Alertness; Polysomnography; Narcolepsy (103) 554

MELAS; Periodic lateralized epileptiform discharges (PLEDs); Mitochondrial encephalomyopathy (103) 370

Mesial temporal sclerosis; Hippocampus; MRI; Depth EEG (103) 692

Mitochondrial encephalomyopathy; Periodic lateralized epileptiform discharges (PLEDs); MELAS (103) 370

Morphology; Sharp waves; Slow waves; Information analysis (103) 426

Motor imagery; Event-related desynchronisation (ERD); Event-related synchronisation (ERS); Mu rhythm; Central beta rhythm (103) 642

Motor unit; Electromyography; Quantitative electromyography; Neurophysiology; Neuromuscular disorders (103) 579

MR-constructed subject's head model; EEG spatial deblurring; High resolution EEG; Surface Laplacian of the potential; Locally-predicted scalp resistance; Event-related potentials (ERPs) (103) 486

MRI; Hippocampus; Depth EEG; Mesial temporal sclerosis (103) 692

Mu rhythm; Event-related desynchronisation (ERD); Event-related synchronisation (ERS); Central beta rhythm; Motor imagery (103) 642

Mu rhythm; Prosthesis; Rehabilitation; Assistive communication; Operant conditioning; Sensorimotor cortex; Electroencephalography (103) 386

Muscle tone reduction; Sawtooth wave; REM (103) 627

MWT; Maintenance of wakefulness test; Excessive daytime somnolence; Sleepiness; Alertness; Polysomnography; Narcolepsy (103) 554

N1; General anesthesia; Information processing; Event-related potentials (103) 268

N2 wave; Event-related potentials; Epilepsy; Habituation; Repetition; P3 wave (103) 450

N300; ERPs; Emotion; P300; Valence; Arousal (103) 298

Narcolepsy; Maintenance of wakefulness test; MWT; Excessive daytime somnolence; Sleepiness; Alertness; Polysomnography (103) 554

Neonate; Stimulus-evoked patterns; Reactivity; EEG (103) 679

Neuromuscular disorders; Electromyography; Quantitative electromyography; Neurophysiology; Motor unit (103) 579

Neuronal complexity loss; Correlation dimension; Carbamazepine; Primary epileptogenic area; Temporal lobe epilepsy; ECoG (103) 376

Neuronal network; Alzheimer's disease; Dementia; Quantitative; EEG; Discriminant analysis; Fractal dimension; Classification (103) 241

Neurophysiology of movement; Gait disorder; Leg muscle activation; Parkinson's disease; Cerebellar gait; Spastic gait; Load receptor function (103) 333

Neurophysiology; Electromyography; Quantitative electromyography; Motor unit; Neuromuscular disorders (103) 579

Newborn; EEG; Seizure; Detection; Evaluation (103) 363

Newborn; Seizure; Detection; EEG (103) 356

Night waking; Sleep homeostasis; Infants; EEG automatic analysis; NREM-REM sleep cycle (103) 621

Non-linearity; Bispectrum; Epilepsy; Cooperativity; Subdural; Hippocampus; Higher moment (103) 661

Novel stimuli; Novelty P3; Cognitive ERPs; Temporal order; Cognitive development (103) 304

Novelty P3; Cognitive ERPs; Temporal order; Cognitive development; Novel stimuli (103) 304

NREM-REM sleep cycle; Sleep homeostasis; Night waking; Infants; EEG automatic analysis (103) 621

Ocular artefact correction; EEG; EOG; Independent component analysis (ICA); Blind source separation (BSS) (103) 395

Operant conditioning; Prosthesis; Rehabilitation; Assistive communication; Sensorimotor cortex; Mu rhythm; Electroencephalography (103) 386

P3 wave; Event-related potentials; Epilepsy; Habituation; Repetition; N2 wave (103) 450

P3(00); Event-related potential (ERP); Aerobic exercise; Auditory/visual stimuli (103) 493

P300; ERPs; Emotion; N300; Valence; Arousal (103) 298

Parkinson's disease; Neurophysiology of movement; Gait disorder; Leg muscle activation; Cerebellar gait; Spastic gait; Load receptor function (103) 333

Periodic lateralized epileptiform discharges (PLEDs); Mitochondrial encephalomyopathy; MELAS (103) 370

PET; Dementia of Alzheimer's Type; EEG; Frequency spectrum analysis; Correlation (103) 409

PET; Frequency spectrum analysis; Dementia of Alzheimer's Type; EEG; Correlation (103) 409

Picture; Alcoholics; Implicit memory; ERP; Priming; Word (103) 457

Polysomnography; Maintenance of wakefulness test; MWT; Excessive daytime somnolence; Sleepiness; Alertness; Narcolepsy (103) 554

Premature newborns; Quantitative EEG; Full-term newborns; Quiet sleep (103) 528

Pre-school age; Developmental neurological diagnostics; Quantitative EEG analysis; Spectral parameters (103) 516

Primary epileptogenic area; Neuronal complexity loss; Correlation dimension; Carbamazepine; Temporal lobe epilepsy; ECoG (103) 376

Priming; Alcoholics; Implicit memory; ERP; Picture; Word (103) 457

Principal component analysis; Waking-sleeping transition period; EEG auto power; Intrahemispheric coherence; Delta band activity; Theta band activity (103) 633

Processing negativity; Visual attention; Feature conjunction (103) 282

Prosthesis; Rehabilitation; Assistive communication; Operant conditioning; Sensorimotor cortex; Mu rhythm; Electroencephalography (103) 386

Quantitative EEG analysis; Developmental neurological diagnostics; Spectral parameters; Pre-school age (103) 516

Quantitative EEG; Premature newborns; Full-term newborns; Quiet sleep (103) 528

Quantitative electromyography; Electromyography; Neurophysiology; Motor unit; Neuromuscular disorders (103) 579

Quantitative; Alzheimer's disease; Dementia; EEG; Discriminant analysis; Fractal dimension; Classification; Neuronal network (103) 241

Quiet sleep; Quantitative EEG; Premature newborns; Full-term newborns (103) 528

Reactivity; Stimulus-evoked patterns; Neonate; EEG (103) 679

Rehabilitation; Prosthesis; Assistive communication; Operant conditioning; Sensorimotor cortex; Mu rhythm; Electroencephalography (103) 386

REM; Sawtooth wave; Muscle tone reduction (103) 627

REM; Stage 2; Stage 2-to-REM sleep transition; Sleep; EEG (103) 543

Repetition; Event-related potentials; Epilepsy; Habituation; N2 wave; P3 wave (103) 450

Reproducibility; Somatosensory evoked potential; Source reconstruction; Validity; Functional magnetic resonance imaging; Boundary element method (103) 652

Safety; Transcranial magnetic stimulation; Electroencephalography; Evoked potentials; Artifact-interrupting circuit; Healthy humans (103) 319

Sawtooth wave; REM; Muscle tone reduction (103) 627

Scaling; Topography; Scalp distribution; Statistics; Event-related potentials; Electroencephalogram (103) 323

Scalp distribution; Topography; Scaling; Statistics; Event-related potentials; Electroencephalogram (103) 323

Scoliosis; EEG; Somatosensory evoked potentials; Surgical monitoring; Carotid endarterectomy; Staffing patterns (103) 616

Seizure adequacy; ECT; EEG; Lyapunov exponent (103) 599

Seizure; Detection; Newborn; EEG (103) 356

Seizure; EEG; Detection; Newborn; Evaluation (103) 363

Seizure; Electroencephalography; Telemetry; Epilepsy; Computer aided diagnosis (103) 445

Sensorimotor cortex; Prosthesis; Rehabilitation; Assistive communication; Operant conditioning; Mu rhythm; Electroencephalography (103) 386

Sharp waves; Slow waves; Morphology; Information analysis (103) 426

Sleep homeostasis; Night waking; Infants; EEG automatic analysis; NREM-REM sleep cycle (103) 621

Sleep; Cortisol secretion; EEG spectral analysis; Delta wave activity; Cross-correlation (103) 405

Sleep; Stage 2; REM; Stage 2-to-REM sleep transition; EEG (103) 543

Sleepiness; Maintenance of wakefulness test; MWT; Excessive daytime somnolence; Alertness; Polysomnography; Narcolepsy (103) 554

Slow waves; Sharp waves; Morphology; Information analysis (103) 426

Somatosensory evoked potential; Source reconstruction; Reproducibility; Validity; Functional magnetic resonance imaging; Boundary element method (103) 652

Somatosensory evoked potentials; EEG; Surgical monitoring; Carotid endarterectomy; Scoliosis; Staffing patterns (103) 616

Source reconstruction; Somatosensory evoked potential; Reproducibility; Validity; Functional magnetic resonance imaging; Boundary element method (103) 652

Spastic gait; Neurophysiology of movement; Gait disorder; Leg muscle activation; Parkinson's disease; Cerebellar gait; Load receptor function (103) 333

Spatial memory; Event-related potentials; Spatial perception; Working memory (103) 257

Spatial perception; Event-related potentials; Spatial memory; Working memory (103) 257

Spectral analysis; EEG; Spindle frequency activity; Brain topography (103) 535

Spectral parameters; Developmental neurological diagnostics; Quantitative EEG analysis; Pre-school age (103) 516

Spindle frequency activity; EEG; Spectral analysis; Brain topography (103) 535

Spline-Laplacian; Coherence; Cortical image (103) 499

Staffing patterns; EEG; Somatosensory evoked potentials; Surgical monitoring; Carotid endarterectomy; Scoliosis (103) 616

Stage 2; REM; Stage 2-to-REM sleep transition; Sleep; EEG (103) 543

Stage 2-to-REM sleep transition; Stage 2; REM; Sleep; EEG (103) 543

Statistics; Topography; Scalp distribution; Scaling; Event-related potentials; Electroencephalogram (103) 323

Stimulus-evoked patterns; Neonate; Reactivity; EEG (103) 679

Subarachnoid hemorrhage; Vasospasm; ICU monitoring (103) 607

Subdural; Bispectrum; Non-linearity; Epilepsy; Cooperativity; Hippocampus; Higher moment (103) 661

Surface Laplacian of the potential; EEG spatial deblurring; High resolution EEG; MR-constructed subject's head model; Locally-predicted scalp resistance; Event-related potentials (ERPs) (103) 486

Surgical monitoring; EEG; Somatosensory evoked potentials; Carotid endarterectomy; Scoliosis; Staffing patterns (103) 616

Telemetry; Electroencephalography; Epilepsy; Seizure; Computer aided diagnosis (103) 445

Temporal lobe epilepsy; Neuronal complexity loss; Correlation dimension; Carbamazepine; Primary epileptogenic area; ECoG (103) 376

Temporal order; Novelty P3; Cognitive ERPs; Cognitive development; Novel stimuli (103) 304

Theta band activity; Waking-sleeping transition period; EEG auto power; Intrahemispheric coherence; Delta band activity; Principal component analysis (103) 633

Theta; Acceleration; Alpha; Beta; Delta; $+G_z$ (103) 563

Tonic-clonic seizures; Gabor; Fourier (103) 434

Topographic component model; Event-related potentials; Component jitter (103) 381

Topography; Scalp distribution; Scaling; Statistics; Event-related potentials; Electroencephalogram (103) 323

Transcranial magnetic stimulation; Electroencephalography; Evoked potentials; Artifact-interrupting circuit; Healthy humans; Safety (103) 319

Valence; ERPs; Emotion; N300; P300; Arousal (103) 298

Validity; Somatosensory evoked potential; Source reconstruction; Reproducibility; Functional magnetic resonance imaging; Boundary element method (103) 652

Vasospasm; Subarachnoid hemorrhage; ICU monitoring (103) 607

Visual attention; Processing negativity; Feature conjunction (103) 282

Waking-sleeping transition period; EEG auto power; Intrahemispheric coherence; Delta band activity; Theta band activity; Principal component analysis (103) 633

Word; Alcoholics; Implicit memory; ERP; Priming; Picture (103) 457

Working memory; Event-related potentials; Spatial memory; Spatial perception (103) 257
